

CERTIFICATIONS

CSIA Certified

Interstates has completed a demanding audit by the Control Systems Integrators Association (CSIA). CSIA is the largest organization in North America for control system integrators. For more than two decades, its mission has been to establish a standard for best practices for control system integrators, awarding certification only to those providers who can meet the most exacting standards for performance in the following key areas:

- | General Management
- | Project Management
- | Financial Management
- | Quality Management
- | Information Systems Management & Cybersecurity
- | Human Resources
- | System Lifecycle Management
- | Business Development
- | Marketing

ISA Certified Automation Professional

Interstates has a number of individuals with the Certified Automation Professional designation. To earn the CAP certification, you must meet experience prerequisites and take a certification exam. Leaders and clients in the automation industry recognize that having Certified Automation Professionals on staff demonstrates a commitment to safer and more productive workplaces.

ISA Certified Control Systems Technician

Interstates currently has several employees certified as Level I ISA Certified Control Systems Technicians. The program has certified more than 4,000 technicians, who must have a minimum of five years of service or a combination of three years of experience with two years of college in instrumentation/electrical to qualify.

Professional Engineer (PE)

A prestigious step in professional growth and development, the PE designation is a legal acknowledgment by a competent body that the recipient has achieved a specified degree of competence and has demonstrated the qualifications necessary to practice as a professional engineer. Interstates currently has over ten engineers that hold a PE license.

CERTIFICATIONS

Project Management Professional (PMP)

Many of our Project Managers have the elite Project Management Professional certification through Project Management Institute. The PMP is an industry-recognized certification, signifying those certified speak and understand the global language of project management.

Rockwell Automation Platinum Systems Integrator

Interstates is a Platinum System Integrator partner of Rockwell Automation, a leading supplier of automation hardware and software in the world. The Platinum level is the highest level of partnership with Rockwell Automation and is only given to a few elite partners who have proven capabilities, experience, and strategic alignment with Rockwell Automation. The Platinum level was established in 2022 and Interstates was selected as one of just four system integrator partners in North America.

AVEVA Registered System Integrator

Interstates is a Registered System Integrator with the AVEVA Partner Network, a global leader in industrial engineering, design, and information management software. As a Registered System Integrator, we are connected to 4,500+ partner companies and 5,700+ certified developers, which opens up the possibilities in how we deliver services to our clients.

Schneider Electric Alliance Certified Partner

Interstates is an Alliance Certified Partner with Schneider Electric, who provide energy and automation digital solutions for efficiency and sustainability. This program brings together a network of industrial automation partners to provide greater value to our customers. The partnership provides continuous training opportunities to broaden our technical capabilities and expand our team's expertise.

Ignition Gold Certified

As a Certified Level Integrator, Interstates has achieved advanced certification in Ignition software with 9 core certified and 3 gold level certified employees. Ignition is a central hub for everything on your plant floor, and it gives you the tools you need to build and deploy any type of industrial application – from SCADA and HMI to IIoT and edge computing.
