

INTRODUCING I-CONTROL BIN INSPECTION: ELEVATING EFFICIENCY & COMPLIANCE IN YOUR FACILITY

Revolutionize Bin Management with Precision and Compliance

Discover the latest innovation in our custom process automation solution, I-Control Bin Inspection. Designed to meet the specific needs of feed and flour mill operators, this feature seamlessly integrates with your existing I-Control system, offering unparalleled control and efficiency in managing your facility's bin inspections.

EFFICIENCY MEETS COMPLIANCE

I-Control Bin Inspection brings a new level of operational power to your facility, ensuring:

- Enhanced Quality Control:** Maintain the highest standards of product quality with regular, automated bin inspection tracking.
- Regulatory Adherence:** Align with state, federal, and your own organizational regulations through automated record keeping and compliance protocols.
- Operational Streamlining:** Replace manual, error-prone processes with an integrated, rule-based bin management system.

HOW IT WORKS

FLEXIBLE INSPECTION RULES:

Create inspection rules based on your specific bins or ingredients, with customizable frequencies and conditions.

PROACTIVE ALERTS:

Receive timely notifications for upcoming inspections.

AUTOMATED BIN HOLDS:

Bins requiring inspection are automatically prevented from receiving new product, ensuring compliance with your protocols.

DETAILED REPORTING:

Access insightful reports on bin inspection schedules and have easy access to a complete history of inspections.

Transform Your Facility Today

Elevate your facility's efficiency and compliance standards with I-Control Bin Inspection. This innovative solution is one more tool to help you on your way to enhanced quality, compliance, and operational excellence.
