

KEEP YOUR PROCESS MONITORED, MEASURED & CONTROLLED

Electrical and Instrumentation (E&I) Services

Our E&I services augment your maintenance staff by providing technicians with specific skill sets that have become increasingly difficult to justify having within a full-time maintenance staff. Support from Interstates can ease the burden on your in-house E&I maintenance technicians. We provide a wide range of solutions from emergency support to routine service to specialized predictive and preventative services.

PREDICTIVE & PREVENTATIVE SERVICES

Compressed Air Leak Audit | Gas Detection System Audit (LEL, Toxic Gases) | Grounding Loop Testing Hazard Monitoring Audit | Heat Trace Audits | IR Scanning | P&ID Audit

OUR SPECIALTIES

Procurement, Installation, Commissioning, & Troubleshooting | Field Calibrations (Pressure, Temperature, & Flow Devices) | Verification of Configuration and Output Communication (mA, Pulse, Frequency) | Custody Transfer Certifications | Plant Startup and Shut Down Support | Maintenance Support for Plant Work Orders & Small Projects | Training on Instruments & Instrument Communication Protocols | Documentation Reports of As Found / As Left Information

On-Call Support Options

When your facility needs electrical help, call the experienced professionals at Interstates. We understand the complexity of industrial electrical systems and our expert assessment can quickly get your facility running again with onsite support whenever requested including nights, weekends, and on an oncall basis. Your Interstates technician also has access to Interstates' 24-hour technical support team.

EMERGENCY SUPPORT

On-site technical instrumentation assistance on short notice.

Regular Hours: 8:00 AM - 5:00 PM

Phone: 605.212.9367

WHAT YOU GET

- | Communication Protocols
- | Technology Expertise
- | Manufacturer Expertise
