

Pulse360 Electrical Maintenance Program

One Partner. One Program. Total Peace of Mind.

Downtime, safety risks, and compliance headaches cost more than you think. Managing electrical safety and maintenance separately only makes it worse—multiple vendors, scattered records, and missed opportunities that put your people and production at risk.

Pulse360 Changes That

We unify NFPA 70E and 70B into a single, contractor-managed program—built around your facility, your schedule, and your bottom line.

The Pulse360 Solution

- ▶ **Protect People (70E):** Comprehensive studies, safe work practices, PPE programs, and training to keep your team safe.
- ▶ **Protect Assets (70B):** Proactive testing, inspections, and maintenance to extend equipment life and improve reliability.
- ▶ **Protect Your Time:** One partner to manage schedules, vendors, and reporting so you stay organized and audit-ready.

The Result: fewer surprises, safer operations, longer-lasting assets, and predictable budgets.

The Pulse360 Journey: From Compliance to Confidence

STEP 1
BUILD YOUR FOUNDATION

| Stay aligned with NFPA 70E and 70B from day one.

STEP 2
CREATE YOUR ROADMAP

| Customized maintenance roadmap build around your assets and NFPA 70B guidance.

STEP 3
EXECUTE WITH CONFIDENCE

| Simplified reporting, predictable budgets, and fewer surprises.

STEP 4
OPTIMIZE FOR RELIABILITY

| Advance from compliance-focused to reliability-driven maintenance.

The Pulse360 Advantage?

- | **Simplifies and supports compliance across NFPA 70E and 70B requirements.**
- | **One partner to schedule, track, and deliver.**
- | **Scales as your facility evolves.**
- | **Protects your people, assets, and uptime.**

With Pulse360, Interstates delivers one integrated program that reduces risk, extends asset life, and powers long-term confidence.
