

# INDUSTRIAL CONTROL PANELS

*Certified, Custom-Built Panels for Your Operations*

For more than 30 years, we've built UL508A & UL698A-certified industrial control panels to meet best-in-class global quality standards and deliver superior, repeatable results.

Our panels include:

- | PLC or DCS Controls
- | Remote I/O
- | HMI and Operator Panels
- | VFD and Starter Panels
- | Power Distribution and Heat Trace Controls
- | Network Panels

## Industries We Serve

Data Centers | Oil & Gas | Mining | Food & Beverage | Agriculture | Water/Wastewater | Food & Beverage  
Agriculture

## Our Process

### PLAN

Understand your unique goals, constraints and requirements

### DESIGN

Develop precise panel layouts and configurations

### MANUFACTURE

Quality constructed and rigorously tested to exceed UL standards

### DELIVER

On-time shipment with optional Factory Acceptance Testing (FAT)

## Benefits At A Glance

### CLIENT COLLABORATION

Real-time progress tracking and remote inspections are available

### TIME SAVINGS

Pre-engineered to reduce on-site labor and installation time

### RELIABLE PERFORMANCE

Built to meet industry standards with an optional extended warranty

### SCALABILITY

Designed to support future expansion and standardization

### ONGOING SUPPORT

Building lasting partnerships with ongoing support.

## Why Choose Interstates?

Interstates provides turnkey industrial control panel solutions that optimize efficiency, safety, and long-term reliability. Backed by innovative manufacturing capabilities and a commitment to quality, we ensure each panel is built to meet your operational requirements while reducing risks, improving uptime, and supporting long-term performance.
