

# OPERATIONAL TECHNOLOGY CYBERSECURITY TRAINING SERVICES

## CREATING A CULTURE OF CYBERSECURITY

In today's high-stakes cybersecurity environment, manufacturers need to consider how they protect their systems. Effective and robust cybersecurity requires a program built on three pillars: people, processes, and technology. Unfortunately, unsuspecting employees inside an organization often fall victim to those with malicious intentions. By exploiting employees, hackers can easily bypass the most complex and sophisticated cybersecurity technology. Keep your employees and your organization safe with our Cybersecurity Training Services.

### TRAINING OPTIONS

#### LIVE REMOTE TRAINING

- Customized training delivered via live stream.
- Employees can attend training from any location.
- Live stream training allows for real-time Q&A.
- Training is recorded and saved for future viewing.

#### LIVE IN-PERSON

- Customized training delivered in person.
- In-person training allows for more employee interaction.
- Training topics can be adjusted based on audience interest.

#### PRE-RECORDED PRESENTATION

- Interstates team records content based on training requirements.
- Videos stored in a secure Learning Management System with reporting.
- Employees will always have access to the presentations.

### TRAINING TOPICS

Cybersecurity for OT

Roles & Responsibility Training

Security for Third Parties

Physical & Personnel Security

Security Standards - Organizational, Industry Specific

## GET STARTED TODAY

You need stronger cybersecurity starting today - and we're ready to work with you to find the smartest solution for your manufacturing environment. **To talk to one of our experts, contact [OTIS@interstates.com](mailto:OTIS@interstates.com).**
